

Ajith Kumar

DevOps Engineer

Immediate Joiner | DevOps Engineer | AWS & Azure | Kubernetes | Terraform | Docker | Jenkins | GitHub Actions | CI/CD | Linux | 4+ Years Experience

ajith.rejimon24@gmail.com | +91 7358635580 | Chennai, India | LinkedIn: [linkedin.com/in/ajith-kumar1024](https://www.linkedin.com/in/ajith-kumar1024)

PROFESSIONAL SUMMARY

Cloud DevOps Engineer with **4+ years of experience** in designing, deploying, and managing highly available and scalable cloud infrastructure across **AWS and Azure**. Strong expertise in **CI/CD automation using Jenkins, GitHub Actions, and Azure DevOps**, with hands-on experience in **Kubernetes (EKS/AKS), Docker, Terraform, CloudFormation, and AWS CDK**. Skilled in **Linux administration, Infrastructure as Code (IaC), cloud monitoring, security, networking, and performance optimization**. Experienced in building automated, resilient, scalable, and cost-efficient cloud solutions in Agile environments.

TECHNICAL SKILLS

Cloud Platforms : AWS, Azure	Version Control : Git, GitHub
Containerization : Docker, Kubernetes (EKS, AKS)	Operating Systems : Linux (Ubuntu, CentOS, Amazon Linux), Windows Server
CI/CD : Jenkins ,Github Actions ,GitLab CI	Scripting : Bash, Shell, Python
Infrastructure as Code (IaC) : Terraform, AWS CloudFormation, AWS CDK, Ansible	Monitoring & Observability : Prometheus, Grafana, ELK Stack, CloudWatch, Azure Monitor
Build & Deployment Tools : Maven, Apache Tomcat	Deployment Strategies : Blue-Green, Canary, Rolling, Zero-Downtime Deployments, Hotfixes
Security & DevSecOps : IAM, RBAC, Policies, Cloud Security Best Practices	Databases : MySQL, SQL , DynamoDB
Artifact Repositories : Nexus, Artifactory, Docker Hub, Amazon ECR	Methodologies & Architecture : Agile, DevOps, Microservices, Serverless Architecture

PROFESSIONAL EXPERIENCE

Box Ventures Pvt Ltd	Aug 2024 – present
Ascendion Engineering Pvt Ltd	Dec 2021 – July 2024

PROJECT EXPERIENCE

Client: IQVIA
Environment: AWS, EKS, ECS (Fargate), EC2, S3, IAM, VPC, Lambda, API Gateway, Jenkins, Docker, Kubernetes, Ansible, CDK, CI/CD, Linux
- Managed production AWS infrastructure (EKS, EC2, VPC) ensuring 99.9% uptime, improving system reliability and reducing downtime by 30%. - Designed and implemented CI/CD pipelines using Jenkins & GitHub Actions, enabling automated deployments across Dev/QA/Prod and reducing release time by 40% - Deployed containerized microservices using Docker on EKS & ECS (Fargate). - Administered EKS clusters with HPA, rolling updates, and namespace management. - Automated batch and scheduled jobs using Airflow, reducing manual intervention and improving reliability - Executed zero-downtime deployments, hotfix releases, and rollback strategies. - Handled P1/P2 production incidents, performed root cause analysis (RCA), and improved system stability - Developed serverless architectures (Lambda + API Gateway) for scalable solutions.

- Managed **IAM roles, policies, and security controls** following best practices.

Client: Centene Corporation

Environment: **Azure, AKS, Docker, Kubernetes, Jenkins, GitHub, Ansible, CI/CD, Linux**

- Architected **highly available Azure infrastructure** with multi-region deployment across production and staging environments.
- Provisioned Azure resources (**VMs, VNet, Load Balancer, RBAC, Key Vault**) using **Infrastructure as Code**, reducing manual effort by **40%**.
- Deployed and managed **50+ containerized microservices on Kubernetes (EKS/AKS)** with auto-scaling and zero-downtime deployments
- Designed and implemented **CI/CD pipelines using Jenkins & GitHub Actions**, reducing deployment time by **40%** and enabling **daily releases**
- Implemented **Blue-Green & Rolling deployments** ensuring zero-downtime releases.
- Automated configuration management using **Ansible**, improving consistency across environments.
- Monitored infrastructure and applications using **Azure Monitor, Prometheus, and Grafana**, proactively identifying and resolving performance and production issues
- Designed and implemented scalable data pipelines using **Apache Airflow** for workflow orchestration and automation
- Strengthened security using **RBAC and Azure Key Vault** for secure access and secret management.
- Optimized cloud resources using **auto-scaling and right-sizing**, reducing cost and improving performance.

Client: Goldman Sachs

Environment: **AWS (EKS, EC2, VPC, IAM, S3, ALB, CloudWatch), Terraform, CloudFormation, Jenkins, GitHub Actions, Docker, Kubernetes, Ansible, Linux, MySQL**

- Managed **production-grade AWS infrastructure** supporting financial applications with **99.9% uptime**, ensuring high availability and reliability.
- Designed and implemented **secure VPC architecture** including public/private subnets, NAT Gateway, route tables, security groups, and load balancers.
- Deployed and managed **containerized microservices using Docker on Amazon EKS**, handling **50+ services** with auto-scaling and zero-downtime deployments
- Built and optimized **CI/CD pipelines (Jenkins, GitHub Actions)**, reducing deployment time by **35–40%** and improving release efficiency.
- Automated infrastructure provisioning using **Terraform and AWS CloudFormation (IaC)** for scalable and repeatable deployments.
- Implemented **Blue-Green, Canary, and Rolling deployment strategies**, ensuring **zero-downtime releases**.
- Monitored applications and infrastructure using **CloudWatch (logs, metrics, alarms)** and enabled automated alerting using **SNS and Lambda**.
- Managed **IAM roles, policies, and KMS encryption**, ensuring compliance with security best practices.
- Optimized cloud cost and performance using **Auto Scaling, Reserved Instances, and right-sizing**, achieving **20–30% cost savings**.
- Provided **production support**, troubleshooting issues related to Kubernetes (EKS), EC2, networking, and CI/CD pipelines under SLA.

EDUCATION

B.E. in Electronics and Communication Engineering

2018 – 2021

M.A.M College of Engineering, Tiruchirapalli

CERTIFICATION

- AWS Certified DevOps Engineer – (Mar 2025)
- Red Hat Certified System Administrator (RHCSA) (Jan 2019)
- Full Stack Java – Systech Group (Aug 2024)
